Economic Impact of Travel & Tourism - Local Tax Impact

Total statewide tax impacts are calculated based on historical average tax rates that indicate that aproximately 8% of traveler spending is collected for state and local tax revenues. Based on Utah's tax distrubution system, the local tax portion is roughly 26% of all tax revenues.

See Appendix B for complete discussion of methodology.

Note: 2001(o) represents statistics using last year's methodology (old). 2001(n) represents statistics using a new methodology. See the methodology section in the appendix for details.
